

Why the two flagged outlier folds fail: actual LAI vs. what training data led every model to expect

evergreen: held-out 2012 vs. its 2000-2011 training climatology
(2011-2012 US Southeast drought)

low_amplitude: held-out 2018 vs. its 2006-2017 training climatology
(erratic, non-seasonal LAI trajectory)
