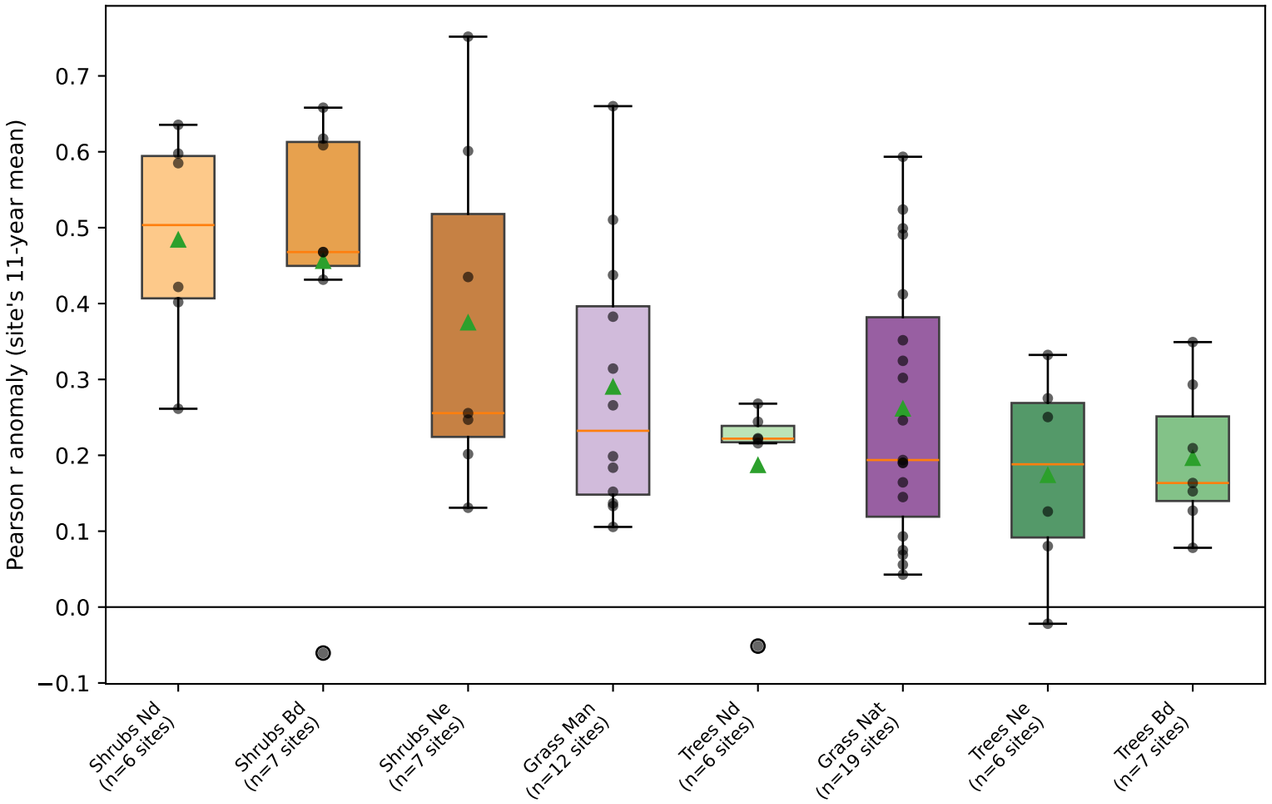
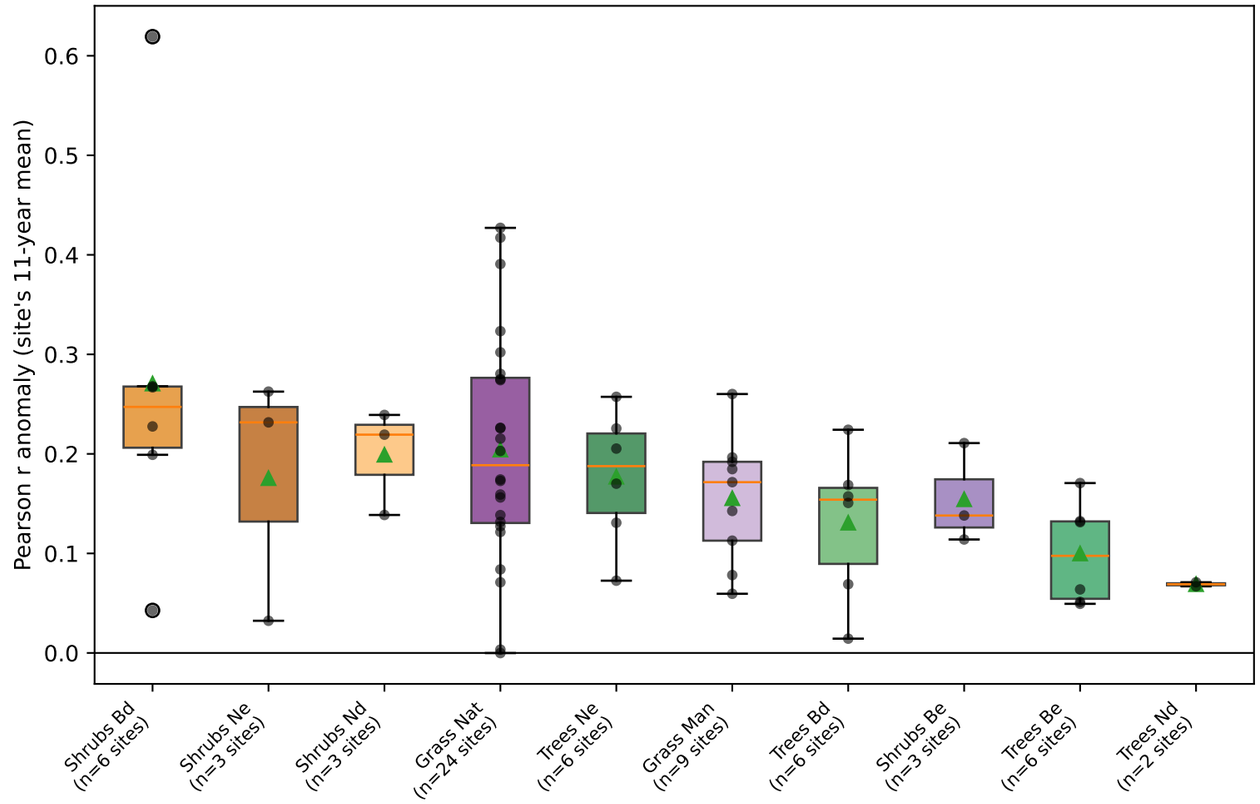
Same data, collapsed to one point per site (11-year mean) instead of one per fold
- the honest sample size per class is the site count, not the fold count

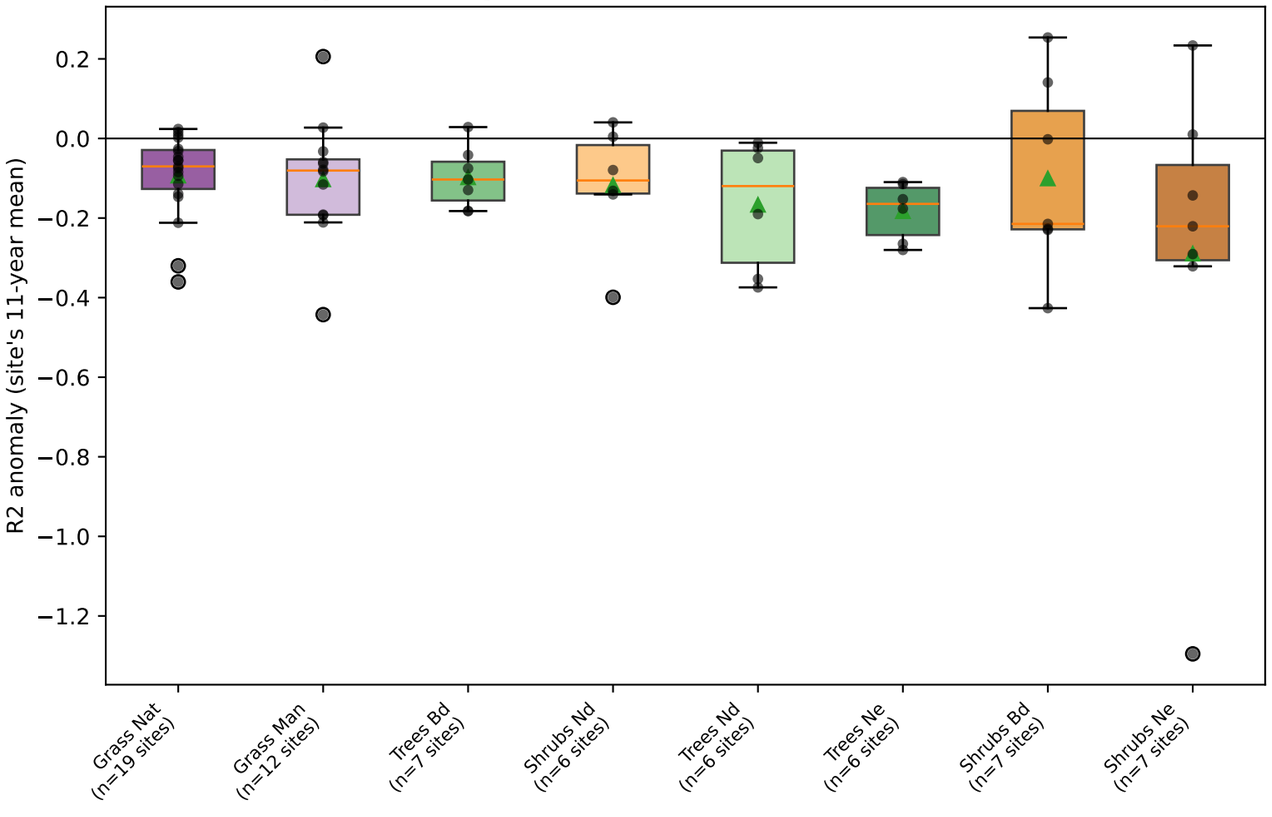
(a) CONUS - Pearson r, per-site 11-yr mean

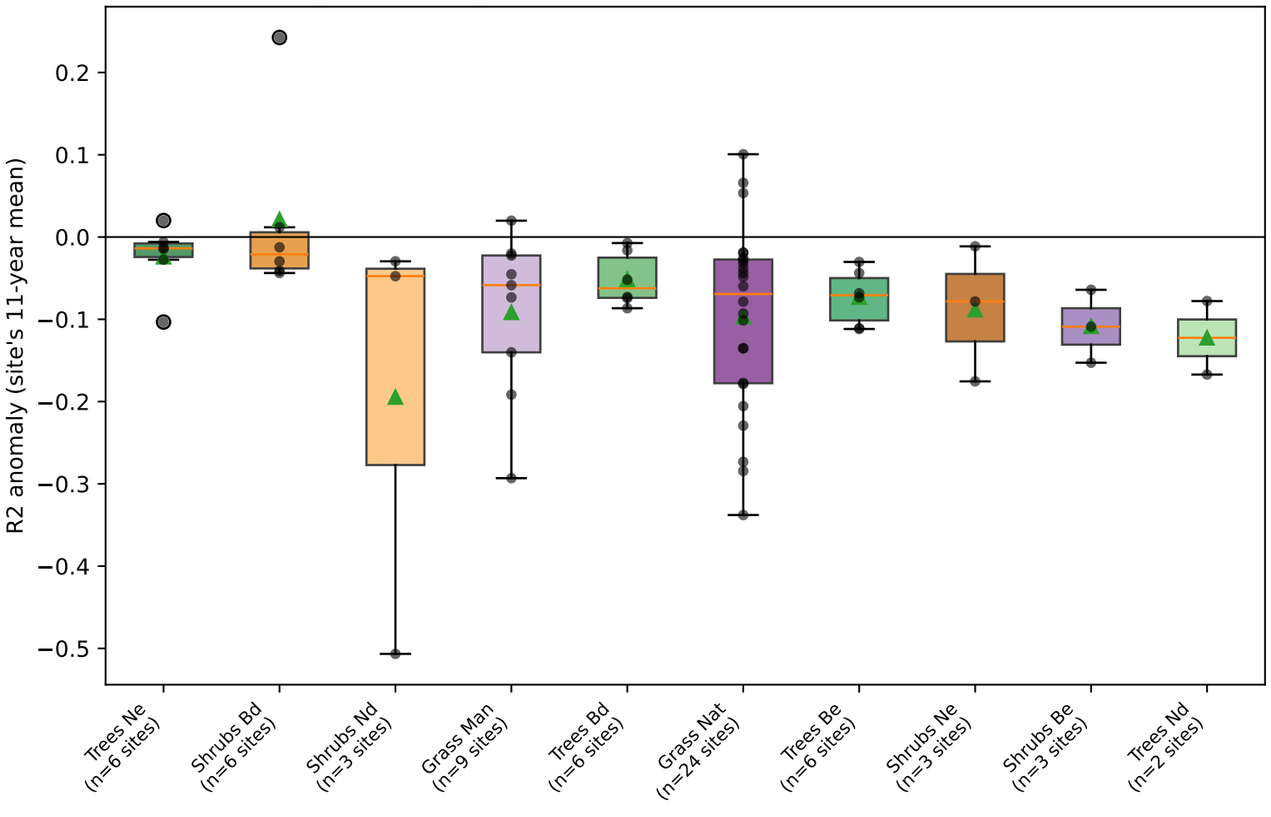


(b) Global - Pearson r, per-site 11-yr mean



(c) CONUS - R², per-site 11-yr mean





(d) Global - R², per-site 11-yr mean
